Hello,

The Pre-RD group has just finished collecting ethyl benzene from the bottom interval at the Nav channel (transect 7). They will finish up sampling after collecting from the bottom interval (approximately 86FT depth) for the Nav channel, within the hour.

Thank you

Jonni

(b) (6)

2nd filter change of the day -3 micron pre filters have not been necessary this sampling round

Collecting 40mL VOA vials
